**■ MESSAGE BY THE IOIS PRESIDENT**

Dear Members of IOIS and Participating Societies and Delegates

We are delighted that you are participating in the 12<sup>th</sup> International Ocular Inflammation Society Congress, held in conjunction with 27<sup>th</sup> Spanish Uveitis Group Special Meeting and 2<sup>nd</sup> International Assembly of Ocular Inflammation Societies. On behalf of IOIS, I thank you for attending the congress and taking part in the Scientific/educational sessions and sharing your expertise with other participating delegates. I am pleased to state that unlike previous IOIS biannual meetings/congress, the current congress attracted several national and international ocular inflammation societies, which have organized sessions with emphasis on unique and common uveitis entities seen in their regions. This could provide a global perspective on the epidemiological aspects and variations in clinical features, management of uveitis and outcomes in deferent parts of the worlds. Moreover, IOIS scientific program committee of the congress added a special session, president's symposium to provide current cutting edge clinical science in the diagnosis and treatment of ocular inflammations. Furthermore to enhance management of ocular inflammation globally, the congress has included teaching sessions organized by Jorge Alio focusing on basic and clinical aspects of the ocular inflammations.

As chair of the scientific program committee I had remarkable support and help in developing outstanding program. This could not have been possible without dedicated help from scientific programs committee members, especially Bahram Bodaghi and Rosa Dolz Marco. The congress host, Professor Manuel Diaz Llopis and his team members including Roberto Gallego-Pinazo were superb in supporting IOIS to accomplish its goal of organizing an outstanding congress at superb venue.

I wish you all enjoyable stay in Valencia and highly fruitful congress in sharing recent advances in the field of Ocular inflammations for better management of our patients and avoiding blindness from uveitis and related ocular inflammations and their complications.

Thank you.

**Narsing A Rao**  
President, IOIS

**MESSAGE BY THE CONGRESS CHAIRMAN** ■

Dear colleagues and friends,

Dear uveitis specialists,

As president of the 12<sup>th</sup> International Ocular Inflammation Society Congress 2014, I am glad of welcoming all of you to Valencia. Our city is a perfect venue for such a fantastic meeting. Make sure to find your time to enjoy our local gastronomy, and to visit our historical monuments and modern architecture buildings. I have been looking forward to having you all together in Valencia.

**Manuel Díaz-Llopis**

**■ AWARDS****IOIS-DAVID BENEZRA MEDAL LECTURE****Challenge in Uveitis**

Prof. Manabu  
Mochizuki, M.D.  
Tokyo, Japan

Uveitis is one of the major causes of acquired blindness in the world. The better understanding in the pathogenesis, establishment of accurate diagnosis, and development of new treatments are the major targets of our research.

In my 40 years-experience in the field of uveitis, ocular immunology and inflammation, I have a dilemma and difficulties in the diagnosis of infectious uveitis. In typical cases it can be suspected infectious etiology by ocular manifestations together with systemic tests and immunological and bacteriological examinations. However, there are many cases presenting atypical manifestations, and also these conventional examinations are not much helpful in some cases and not prompt enough for our clinical practice. In the last decade, developments of molecular diagnosis such as polymerase chain reaction (PCR) make it possible to detect genomic DNAs of various infectious agents and have been applied for diagnosis of ocular inflammatory diseases.

We challenged to apply the PCR technique in uveitis and established a new diagnostic tool, comprehensive PCR system using small aliquot of intraocular fluids for diagnosis of intraocular infectious diseases. The comprehensive PCR system consists of (1) qualitative multiplex PCR combined with quantitative real-time PCR for all 8 types of human herpes viruses (HHV) and toxoplasmosis, and (2) broad range real-time PCR for bacterial species (bacterial 16 ribosomal DNA) and for fungal species (fungal 18S or 28S ribosomal DNA). The bacterial broad range real-time PCR detects genomic DNA of more than 60% of whole bacterial species and we further confirmed that the PCR was able to detect genomic DNA of 16 bacteria species that were commonly found as pathogens of bacterial infectious diseases of the eye.

Our experiences in many patients with uveitis and endophthalmitis disclosed the comprehensive PCR system is very helpful. We further performed a prospective multicenter clinical study in Japan to examine the reliability of the comprehensive PCR system using ocular fluids of 500 patients of various clinical entities of uveitis and endophthalmitis together with 100 control patients with non-inflammatory ocular diseases. It was found that sensitivity, specificity, positive predictive, and negative predictive value were extremely high, i.e. 91.8%, 98.8%, 98.6%, and 92.4%, respectively. Thus, the comprehensive PCR system using only 0.1mL of intraocular fluids provides us accurate and prompt results whether genomic DNA of 8 HHVs, toxoplasmosis, bacterial species, and fungal species are present or absent in the local site of intraocular diseases. It is concluded that the system is very useful for diagnosing ocular diseases and screening of patients for intraocular infections, and further making decisions of treatments of our patients.

Jorge L. Alio MD,  
PhD, FEBO  
Alicante, Spain

Jorge Alio jointly with David BenEzra developed the idea of creating the International Ocular Inflammation Society (IOIS), in 1990 during the first International Symposium on Ocular Inflammation which was organized in Alicante by both of them. Jorge Alio was involved from the beginning as General Secretary and treasurer, a position which he held until the IOIS meeting in Goa in 2011, where he took the position of Executive Office.

Since then Jorge Alio has contributed to the organization, funding and dissemination of the IOIS. He collaborated with the organization of all the International Symposiums of the society and also organized courses on behalf of the IOIS in different meetings such as the ESCRS, SOE and WOC. He contributed in launching of the initial peer review journal of the IOIS "Ocular Immunology and Inflammation" and, recently the new journal of the society "Journal of Ocular Inflammation and Infection".

Dr Alio's areas of scientific interest include ocular inflammation, focusing mainly on cornea, cataract and refractive surgery. He has been the author or co-author of 440 peer review papers, 241 book chapters, 78 books (as editor or co-editor), and over 1000 presentations and invited lectures in international meetings. At present, he holds the LXIII chair of the Academia Ophthalmologica Internationalis, XLIX chair of the European Academy of Ophthalmology and has received a total of 75 international and national awards including two Barraquer Awards (ISRS/AAO) (KMSG), the Rayner Medal (UKIRS), the Arruga Award (SEO) Acknowledgment, Senior and Secretariat Awards of the AAO, Lifetime Achievement Award (ISRS/AAO), two Kelman Award (V,R, 650), Strampelli Award (IRSS), Guillermo Pico Award (SPO) Waring medal (Slack inc.) and Bober Ans Award (DOE). He has directed a total of 56 PhD doctorate projects and is visiting professor of several European, Latin American and US universities. Dr Alio participates in a number of boards of international scientific ophthalmological organizations. He is elected member of the American Ophthalmological Society. He is the founder of the Foundation that has his name dedicated to the promotion of the prevention of blindness with actions both in Spain and on international levels, particularly in Mauritania where an Eyesight Center is being created at the present moment with the support of other international charity organizations.

Dr Alio has been Professor and Chairman of Ophthalmology since 1987 first at the University of Alicante and since 2002 at the University Miguel Hernandez de Elche, also in Alicante, Spain.

## HOW TO ARRIVE

**Valencia** is located in the **eastern coast of Spain**, at 354 km east of Madrid and at 351 km to the south of Barcelona. By plane it is directly connected to the main capitals of Europe. Delegates arriving at Madrid or Barcelona's airports, can either take connection flights or reach Valencia by train.

### BY PLANE

**Valencia's International Airport** is located in the nearby town of **Manises**, at about 8 km from the city. Valencia connects with destinations all over the world, either directly or through Madrid and Barcelona. The main operating companies are **IBERIA**, **AIR NOSTRUM** and **AIR EUROPA**. This airport also operates with low cost companies. From the airport you can take a taxi or the underground to reach the **Valencia Conference Centre** or your hotel.

### BY TAXI

Valencia's airport is a safe place, so don't doubt on taking a taxi from this point. The trip to the Valencia Conference Centre takes about **25 minutes** and costs around **20 €**. Taxi trips that start at the airport are always more expensive since they include a special airport fare. Except specified, most taxis don't accept credit card payments so **be sure to have some pocket money** when arriving. Taxi is the best option to reach hotels or the Valencia Conference Centre after 19h or very early in the morning. Just provide the name of your hotel and the taxi driver will select the most convenient route.

### BY UNDERGROUND

There are two underground lines which link the airport, the city centre and the port. **Line 3 (Airport-Rafelbunyol)** and **Line 5 (Airport-Marítim Serrería or Torrent)**. It takes about 20 minutes to arrive to the city centre. First train departs at 5:29 a.m. and the last train at 23:59 p.m., with trains **every 25 minutes**. To get to the Valencian Convention Centre or nearby hotels, you may follow this instructions: At the airport you must take line 3 or 5, get down at the station **Ángel Guimerà**, then take line 1 direction Seminari, Bétera or Lliria and get off at **Empalme station**. Finally, take line 4 direction Dr.Lluch until you arrive to the **Palau de Congressos** (Valencia Conference Centre) station.

**I GENERAL INFORMATION****BY TRAIN**

Valencia can be easily reached by train from Madrid or Barcelona. Trains from these two cities arrive at Valencia Joaquín Sorolla station in the heart of the city. From Barcelona departure is from Sants Station and you can take different trains that reach Valencia in about 3 – 3h30 hours. From Madrid departure is from Puerta de Atocha station. The fastest option by train from Madrid is the AVE Madrid-Valencia (high speed train), that connects both cities in 1:35 h (direct) and 1:50 h (with two stops). A cheaper and slightly slower option are the Alvia trains that reach Valencia in 2 or 3 hours. For more information about fares, timetables etc, please check RENFE's website by clicking below:

**TIPS FOR TRIP****I Selecting your clothes**

Valencia has an excellent climate, usually enjoying mild winters with average minimum and maximum temperatures that go from 12 to 19 °C during the month of February, when the congress will take place.

**I Electric appliances**

In Spain, as in almost all countries in Europe, the power supply is of 220V–50Hz, with type C plug-socket (power point). Don't forget to bring with you the power converters of your laptops, cellular phones, iPod, iPad, photo-camera and any electric appliance, and of course bring with you the corresponding adapter for your plug to fit the type C socket.

**I Currency**

The Euro is the ONLY currency accepted in Spain. Major credit cards are widely accepted.

Visit the European Central Bank website to see daily official exchange reference rates.

**I Emergency phone numbers**

- Emergency phone in Spain 112 (free)
- Local police 091 / 092 (free)
- Congress Secretariat 24hrs Emergency phone **+34 638 940 895**

For use only if you find yourself in an unknown place in the city of Valencia, or if you encounter problems with transfers, or last minute cancellations.

## ■ SCIENTIFIC PROGRAMME 27th FEBRUARY 2014, THURSDAY

### I Dr. H. Kaplan. USA

Role of vitrectomy in resolution of CME in uveitis

### I Dr. P. LeHoang. France

Surgical management of uveitic glaucoma

### I Dr. F. Mackensen. Germany

Update on current practice patterns in Behçet's, JIA and HLA B27-associated uveitis.

### I Dr. A. Adan. Spain

Systemic therapy vs local in non-infectious uveitis.

### I Dr. B. Bodaghi. France

Scientific exchange Q&A

**11.30 AM – 01.00 PM**

## OPENING CEREMONY

AUDITORIUM 2

**1.00PM –02.30PM**

## IOIS BOARD MEETING

HALL SC3+4

**01.00 PM – 02.30 PM**

## LUNCH SYMPOSIUM

Non-infectious uveitis: update on pathogenesis and therapeutic management.

AUDITORIUM 2

Session sponsored by:

**abbvie**

Moderator

Dr. Bahram Bodaghi. France

### I Dr. J. Rosenbaum. USA

Immunopathology of non-infectious uveitis and therapeutic targets of ocular inflammation.

02.30 PM – 04.00 PM

## SESSION 6

Diabetes and Age-related Macular degeneration

IOIS SESSION

Session sponsored by:

### AUDITORIUM 2

#### Moderators

Dr. S. Ishida. Japan

Dr. C.C. Chan. USA

#### | Dr. A. Dick. UK

Myeloid activation can dictate angiogenic potential in retinal and choroid

#### | Dr. C.C. Chan. USA

Interleukine-17 as an attractive therapeutic target in age-related macular degeneration

#### | Dr. Y. Ozawa. Japan

Light-induced cellular responses in the RPE-choroid: the barrier disruption and inflammation

#### | Dr. M. Nozaki. Japan

Is diabetic retinopathy an inflammatory disease?

#### | Dr. A.M. Abu El-Asrar. Saudi Arabia

A novel role for high mobility group box -1 in the pathogenesis of diabetic retinopathy

#### | Dr. S. Ishida. Japan

Intraocular inflammation and renin-angiotensin system activation

02.30 PM – 04.00 PM

## SESSION 7

Intermediate, posterior and pan-uveitis

IOIS SESSION

### AUDITORIUM 3

#### Moderators

Dr. I.Tugal-Tutkun. TURKEY

Dr. J.L. Davis USA

#### | Dr. A. Adan. Spain

Intermediate uveitis and retinal vasculitis: clinical findings and imaging

#### | Dr. V. Gupta Saudi Arabia

Differential diagnosis and systemic work-up of intermediate uveitis and retinal vasculitis

#### | Dr. J. Smith. Australia

Immunopathology of intermediate uveitis and retinal vasculitis

#### | Dr. L. Arellanes. Mexico

Medical treatment of intermediate uveitis

#### | Dr. N. Sen. USA

Medical treatment of retinal vasculitis

#### | Dr. Q.D. Nguyen and D.V. Do. USA

Surgical treatment of intermediate uveitis, pars planitis subtype and other retinal vasculitis.

WILL BE DISPLAYED IN SCREENS IN THE EXHIBITS AREA**

- P.40** Optic neuritis and oculomotor nerve palsy revealing acute disseminated encephalomyelitis: Case report  
Moncef Khairallah, Fattouma Bourguiba University Hospital
- P.41** Clinical spectrum of presumed ocular tuberculosis in Tunisia, North Africa  
Moncef Khairallah, Fattouma Bourguiba University Hospital
- P.42** Adult Coat's disease and uveitis  
Ankush Kawali, Narayana Nethralaya
- P.43** Long term follow-up of patients with early acute Vogt-Koyanagi-Harada disease treated with high-dose systemic corticosteroids  
Salim Ben Yahia, Fattouma Bourguiba University Hospital
- P.44** Clinical profile, visual outcome and treatment of posterior scleritis with focus on misdiagnosed cases in a tertiary center in India  
Parthapratim Dutta Majumder, Sankara Nethralaya
- P.46** Sarcoid uveitis in southern Europe. A descriptive analysis.  
Víctor Llorenç, Institut Clínic d'Oftalmologia (ICOF), Hospital Clínic
- P.47** Evaluation of microorganisms related with conjunctivitis and antimicrobial susceptibility  
Ozkan Kocamis, Ahi Evran University Research and Teaching Hospital, Ophthalmology
- P.48** A rare case of post-kala azar ocular leishmaniasis  
Simon Couture, Moorfields Eye Hospital
- P.49** Pregnancy and abortion effect on chronic uveitis - a case report  
Ankush Kawali, Narayana Nethralaya
- P.50** Is cataract surgery safe in scleritis?  
Somasheila Murthy, LV Prasad Eye Institute
- P.51** Efficacy of intra-vitreal OzurdexTM in uveitic eyes with cystoid macular edema  
Somasheila Murthy, LV Prasad Eye Institute
- P.52** Posterior subtenon triamcinolone acetonide injection for local control of Vogt-Koyanagi-Harada syndrome  
Bernardo Ruben Pinto Martins, UFMG
- P.53** Switching to golimumab after other anti-TNF failures in refractory uveitis.  
Víctor Llorenç, Institut Clínic d'Oftalmologia (ICOF), Hospital Clínic
- P.54** Scleritis posterior with panuveitis associated to influenza vaccine  
Maria Luisa Perez Gancedo, Hospital Virgen de la Salud

- P.55 Successful treatment of scleritis and panuveitis with rituximab in rheumatoid arthritis patients  
Natasa Vidovic Valentincic, Eye Hospital, University Clinical Centre
- P.56 Benign Reactive Lymphoid Hyperplasia presented with unilateral ptosis  
mehmet erkan doğan, Akdeniz university
- P.57 Visual outcome of ocular toxoplasmosis in an University Center in Argentina  
Ariel Schlaen, Hospital Universitario Austral
- P.58 Ocular syphilis: case series (2000-2009) from two tertiary care centers in Montreal  
Kinda Najem. Laurence Jaworski. Annie-Claude Labbé. Claude Fortin . Éric Fortin. Marie-Lyne Béclair. Bouchra Serhir. Marie-Josée Aubin.
- P.59 Dexamethasone Intravitreal Implant in the Treatment of Recalcitrant Uveitic Macular Edema in the Absence of Active Inflammation  
Mark Dacey, Colorado Retina Associates, P.C.
- P.60 Ultra-wide field fluorescein angiography in patients with uveitis  
Shuichiro Hirahara, Department of Ophthalmology and Visual Science, Nagoya City University Graduate School of Medical Sciences
- P.61 Bilateral diffuse uveal melanocytic proliferation (B-DUMP) and B-cell lymphoma. A case report  
Maria Pefkianaki, Moorfields Eye Hospital
- P.62 Diagnostic utility of mediastinal- lymph node biopsy in patients with Sarcoidosis related uveitis.  
Luca Cimino, Head of Ocular Immunology Unit, Eye Unit, Arcispedale S. M. Nuova IRCCS, Reggio Emilia, Italy
- P.63 Association analysis of HLA-DRB1 alleles with the development and clinical manifestations of sarcoidosis in a large Japanese cohort  
Akira Meguro, Department of Ophthalmology, Yokohama City University School of Medicine
- P.64 Caterpillar hair induced pars planitis  
ParthaPratim Dutta Majumder, Sankara Nethralaya
- P.65 Case series of CMV hypertensive uveitis with few atypical cases.  
Ankush Kawali, Narayana Nethralaya
- P.66 Early introduction of systemic immunosuppressive therapy in paediatric intermediate uveitis: a better outcome?  
Simon Couture, Centre Universitaire Ophtalmologie de Quebec, Hopital St-Sacrement, Universite Laval, Quebec
- P.67 Posterior Scleritis: Presentation, Clinical Course and Visual Outcome  
Radgonde Amer, Hadassah University Hospital

**■ IOIS E-POSTERS  
WILL BE DISPLAYED IN SCREENS IN THE EXHIBITS AREA**

- P.68** Optic neuritis and rapidly progressive necrotizing retinitis as the initial signs of subacute sclerosing panencephalitis: A case report with clinical and histopathologic findings  
Merih Oray, *Istanbul University Istanbul School of Medicine Department of Ophthalmology*
- P.69** Hereditary Retinal Degenerations Masquerading as Posterior Uveitis  
Jenifer Esther Ruiz Sará, *Hospital Universitario Virgen de la Arrixaca*
- P.70** Cirrus SD-OCT Performance measuring choroidal thickness in acute central serous chorioretinopathy and healthy eyes  
Lorena Solé González, *University Hospital of La Candelaria*
- P.71** Choroidal granulomas visualization by Enhanced Depth Imaging Optical Coherence Tomography  
Alessandro Invernizzi, *Eye Clinic, Department of Biomedical and Clinical Science, Luigi Sacco Hospital, University of Milan, Milan, Italy*
- P.72** Spectral domain ocular coherence tomography features in paediatric cases of active and healed toxoplasmic retinochoroiditis  
Radhika Krishnan, *Moorfields Eye Hospital*
- P.73** Vogt-Koyanagi-Harada disease in Mexican Mestizo children  
Luz Elena Concha del Rio, *Asociacion para evitar la ceguera en Mexico*
- P.74** Combined Depth Imaging of Choroid  
Padmamalini Mahendradas, *Narayana Nethralaya*
- P.75** Inmune recovery uveitis after HAART treatment  
Alberto Afonso Rodríguez, Ruymán Rodríguez Gil, Nicolas Kalitovics Nobregas, Pedro Abreu Reyes, Alberto Afonso Rodríguez, *Hospital Universitario Nª Señora de Candelaria, Tenerife, Spain*
- P.76** Atypical Neurorretinitis course in chilhood  
Ruymán Rodríguez Gil, Alberto Afonso Rodríguez, Gil Hernandez Mª Antonia., *Hospital Universitario Nª Señora de Candelaria, Tenerife, Spain.*
- P.77** solitary choroidal granuloma as an initial manifestation of systemic sarcoidosis  
Luis Mª Cacharro Moras, *Service of Ophtalmology, University Hospital of Salamanca*
- P.78** Recurrent uveitis associated with streptococcal pharyngitis and serous otitis media in apediatric patient  
Elisabet Martín García, *Ophthalmology Service. Complejo Asistencial Universitario de Salamanca.*
- P.79** Macular characteristics of patients with ankylosing spondilitis without uveitis history  
Mustafa Doğan, *Afyon Kocatepe University*

- P.80 **granulomatous uveitis secondary to previous practice tattoo**  
Alfredo Pueyo Ferrer, Vall d'Hebron Hospital
- P.81 **Polyangiitis Nodosa. Atypical onset with ocular involvement.**  
Jaime Rigo Quera, Vall d'Hebron Hospital
- P.82 **Presumed Ocular Tuberculosis**  
Joana Portelinha, Hospital de Egas Moniz, Centro Hospitalar Lisboa Ocidental
- P.83 **Development of a Bayesian belief network for the differential diagnosis of anterior uveitis**  
Julio José González-López, Moorfields Eye Hospital NHS Foundation Trust
- P.84 **The value of electrophysiological testing in the diagnosis and management of unusual "posterior uveitis" cases.**  
Marta Ugarte, Moorfields Eye Hospital
- P.85 **Acute- retinal epithelitis or krill disease: a case report**  
Maria Antonia Gil Hernandez, Candelaria Hospital
- P.86 **Punctate Inner Choroidopathy (PIC): unilateral relapses, bilateral choroidal neovascularization (CNV) and response to Dexamethasone Implant and Bevacizumab**  
Jacobo Gonzalez Guijarro. Vanesa Fuertes Barahona. Luís Teichelmann Gutiérrez.
- P.87 **Acute Retinal Necrosis**  
Maria Picoto , Hospital de Egas Moniz, C.H.L.O.
- P.88 **Not everything that glitters at the fundus is an infection**  
Jacobo Gonzalez Guijarro, Paula Marticorena Alvarez.
- P.89 **Retinal Vascular Occlusions In Patients With Behçet's Uveitis**  
Messaoud Riadh, Department of Ophthalmology
- P.90 **Factors Associated with Anatomic and Visual Outcomes in Acute Retinal Necrosis**  
Nobuyuki Oguro, Osaka Koseinenkinn Hospital
- P.91 **PCR of aqueous humor in atypical cases of ocular toxoplasmosis**  
Joana Portelinha, Hospital de Egas Moniz, Centro Hospitalar Lisboa Ocidental
- P.92 **Eyelid Edema As Initial Manifestation Of Hyperthyroidism**  
Messaoud Riadh, Department of Ophthalmology
- P.93 **Optic neuropathy secondary to severe preseptal cellulitis in a child**  
Hazlita Isa, Universiti Kebangsaan Malaysia Medical Center (UKMMC)
- P.94 **The various presentations and manifestations of ocular tuberculosis.**  
Hazlita Isa, Universiti Kebangsaan Malaysia Medical Center (UKMMC)

**■ IOIS E-POSTERS  
WILL BE DISPLAYED IN SCREENS IN THE EXHIBITS AREA**

- P.95    **The Utility of PET Imaging in Uveitic Patients**  
Wroblewski Keith, Walter Reed National Military Medical Center
- P.96    **Idiopathic bilateral posterior scleritis: a report of two cases.**  
María Leonor González García, Virgen del Rocío University Hospital
- P.97    **A case of acute zonal occult outer retinopathy complicated by uveitis**  
Tomoe Uno, Department of Ophthalmology, Hokkaido University Graduate School of Medicine
- P.98    **CMV Retinitis in a Patient with Hypogammaglobulinemia associated with thymoma (Good's Syndrome)**  
Ponpan Matangkasombut Choopong, Mahidol University
- P.99    **bilateral occlusiveretinitis treated with intravitreal triamcinolone acetonide**  
Namita Dave, Narayana Nethralaya
- P.100    **Vogt-Koyanagi-Harada disease in childhood**  
Rim Kahloun, Fattouma Bourguiba University Hospital
- P.101    **role of detecting CD4/CD8 ratio in aqueous humor of patients with uveitis**  
Namita Dave, Narayana Nethralaya
- P.102    **Bilateral interstitial keratitis with hypopyon due to herpes simplex virus 2 (HSV2): A rare presentation**  
Namita Dave, Narayana Nethralaya
- P.103    **Bilateral Herpes simplex Uveitis - Case Report**  
Alejandra de-la-Torre, Universidad del Rosario
- P.104    **Peripheral immune response in human toxoplasmosis depends on clinical condition but not on the antigen**  
Alejandra de-la-Torre, Universidad del Rosario
- P.105    **Acute retinal necrosis after myelitis associated with Epstein-Barr virus**  
Lorena Haefeli, Federal University of Minas Gerais - São Geraldo Hospital
- P.106    **Depressive Psychosis in Chronic Uveitis**  
Shah Md Bulbul Islam Bulbul, Dhaka National Medical College
- P.107    **Recurrent granulomatous anterior uveitis in patient with a high suspicion of berylliosis.**  
María Paz Galván Carrasco, H.U. Virgen del Rocío
- P.108    **To report the efficacy and safety of intravitreal dexamethasone implant (Ozurdex) in treatment of non-infectious uveitis**  
Olivia Li, Chelsea and Westminster Hospital
- P.109    **A Case Of Panuveitis With Buerger's Disease**  
Ece Turan-Vural, İstanbul

- P.110 Our experience in viral retinal necrosis**  
Oscar Luis Lozano Bernal, Hospital Universitario Virgen del Rocío
- P.111 Infectious keratitis following LASIK**  
Moncef Khairallah, Fattouma Bourguiba University Hospital
- P.112 Fundus autofluorescence in diagnosis and follow-up of white-dot syndromes**  
Marion Funk, Medical University of Vienna
- P.113 Advanced Imaging in Retinal Vasculitis**  
Nicole Stuebiger, Charite, University Eye Clinic
- P.114 Outcome of cataract surgery in patients with uveitis**  
Sonia Labrador Velandia, Hospital Clínico Universitario de Valladolid
- P.115 Observational multicenter study of intravitreal dexamethasone implant in Uveitis: Baseline characteristics, clinical outcomes and reinjection frequency**  
Javier Zarzana-Ventura, Bristol Eye Hospital
- P.116 Hypertensive anterior uveitis. Retinal and leptomeningeal relapse of a plasmacytoma**  
Jacobo González Guijarro. Luís Teichelmann Gutiérrez. Ángela Figuera Álvarez.
- P.117 Tuberculosis presenting as retinal vasculitis**  
Vanessa Lemos, Centro Hospitalar de Lisboa Central
- P.118 Intraocular inflammation associated with dengue in the 2013 epidemic**  
Bernardo Ruben Pinto Martins, UFMG
- P.119 MicroRNA-146a and Ets-1 gene polymorphisms are associated with pediatric uveitis**  
Qingyun Zhou, The First Affiliated Hospital of Chongqing Medical University
- P.120 Bilateral Optic Nerve Swelling as Presenting Sign for Vogt -Koyanagi -Harada syndrome: Case Report**  
Tahra AlMahmoud, United Arab Emirates University
- P.121 Adalimumab and Acute Acquired Incomitant Esotropia in a Patient Treated For Uveitis: Case Report**  
Tahra AlMahmoud, United Arab Emirates University
- P.122 Topical ganciclovir for cytomegalovirus corneal endotheliitis**  
Chang-Ping Lin, Department of Ophthalmology, National Taiwan University Hospital, Taiwan
- P.123 Ocular findings in Takayasu's arteritis is milder in a Turkish series**  
Fehim Esen, Marmara University Medical School, Department of Ophthalmology, Istanbul, Turkey
- P.124 Clinical Features of Herpes Virus-induced Anterior Uveitis**  
Kimiko Okinaga, Ophthalmology, Saitama Red-Cross Hospital, Saitama-city, Saitama, Japan

**■ IOIS E-POSTERS  
WILL BE DISPLAYED IN SCREENS IN THE EXHIBITS AREA**

- P.125 **Vogt-Koyanagi-Harada Syndrome: Review of 32 cases diagnosed in our area.**  
Alejandro Filloy Rius, Hospital Universitari de Bellvitge
- P.126 **Could we begin to describe the relentless placoid chorioretinitis as an independent entity?**  
Pablo Hernandez-Martinez, University and Polytechnic Hospital La Fe
- P.128 **Punctate Outer Retinal Toxoplasmosis and Kyrieleis vasculitis**  
Soraya Mediero Clemente, Hospital La Paz
- P.129 **Aflibercept for inflammatory CNV partially responsive to ranibizumab**  
Pablo Hernandez-Martinez, University and Polytechnic Hospital La Fe
- P.130 **Choroidal neovascularization as unusual ophthalmic manifestation of cat-scratch disease in 8-year-old girl.**  
Antonio Solimeo, A.O.R.N. A. CARDARELLI Naples Italy
- P.131 **Rituximab Treatment for Refractory Necrotizing Idiopathic Scleritis**  
Gustavo Ariel Budmann, Hospital Oftalmológico Pedro Lagleyze

# Non-Infectious **Uveitis**

## Update on Pathogenesis and Therapeutic Management

Thursday 27<sup>th</sup> February 2014  
13:15–14:15

Auditorium 2  
Valencia Convention Centre

**CHAIR:** Professor Bahram Bodaghi (France)

### **AGENDA**

13:15	Welcome and introduction	Professor Bahram Bodaghi (France)
13:17	Immunopathology of non-infectious uveitis and therapeutic targets of ocular inflammation	Dr James Rosenbaum (USA)
13:30	Update on current practice patterns in Behçet's, JIA, and HLA B27-associated uveitis	Dr Friederike Mackensen (Germany)
13:43	Systemic therapy vs local in non-infectious uveitis	Professor Alfredo Adán (Spain)
13:56	Scientific exchange Q&A	Moderator: Professor Bahram Bodaghi (France)

# The Kowa FM-700

FM-700  
demonstrations  
on stand!  
Visit Kowa on  
Stands 3 & 4

- your ideal partner for the management of Uveitis patients and ocular inflammation

Laser flare photometry is the only objective and quantitative method to reliably measure active inflammation in the anterior chamber.

Kowa's unique aqueous flare meter (Kowa FM-700), allows you to improve assessment of inflammation and provide a consistent follow up to patients by enabling the in-vivo measurement of laser flare in a non-contact, non-invasive and painless manner.

The quantitative and precise measurement of laser flare it provides is essential in the management of patients with uveitis and other ocular inflammatory diseases.

The Kowa FM-700 has been designed to combine the ultimate in accuracy and efficiency providing fast detection of ocular inflammation and subclinical change of inflammation levels.

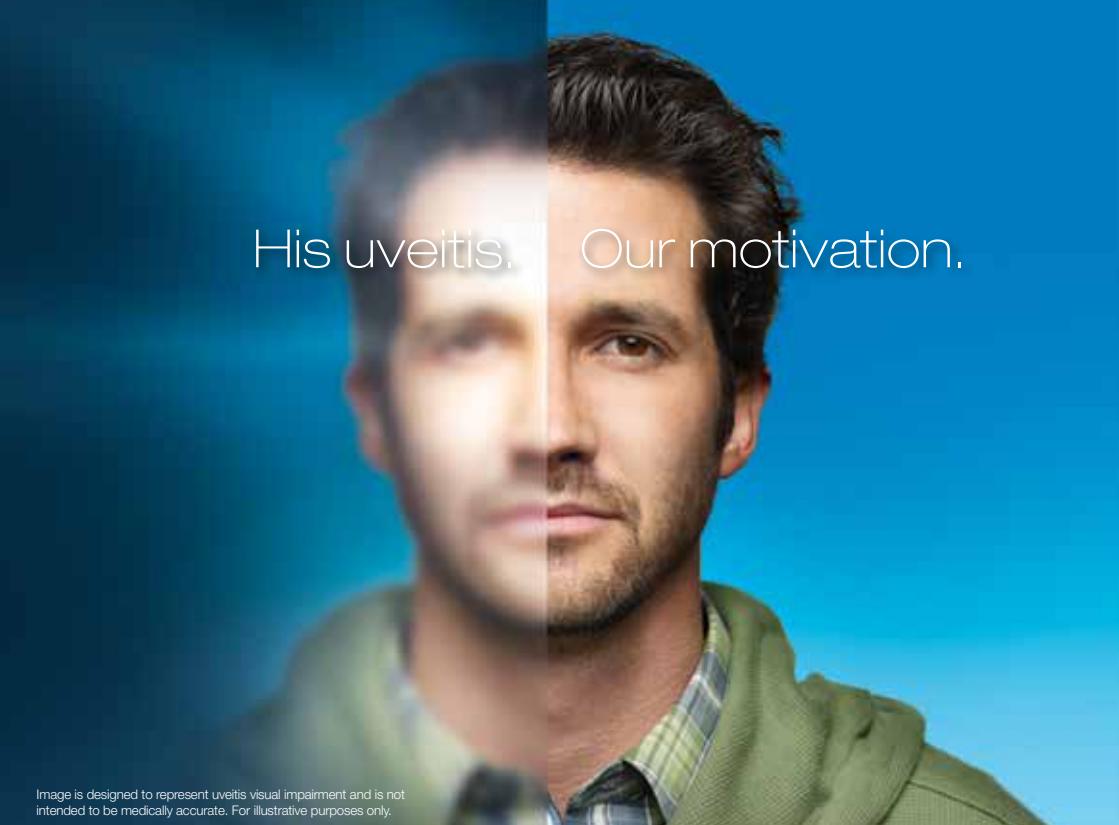

- Easy alignment guide
- Precise results
- Non-contact, non-invasive measurement
- Comprehensive management of inflammatory diseases
- Monitors inflammation post IOL surgery

a luncheon symposium on  
Saturday, March 1, 2014

**THE ART OF  
IMMUNOSUPPRESSION IN  
NON-INFECTIOUS UVEITIS**

Moderated by  
Quan Dong Nguyen, MD, MSc  
(Omaha, USA)

Visit us at **Booth #9-10**

At Santen, our single focus in ophthalmology enables research of novel therapies in uveitis, AMD, glaucoma, and dry eye/corneal disorders—therapies determined to challenge eye disease, one patient at a time.

**Santen**

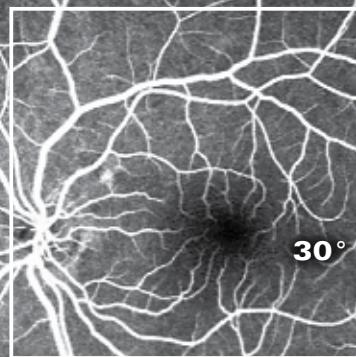

Inspiring ophthalmic medicines

Is a proud sponsor of the

# See the whole Picture

IOIS Session 20  
Friday, Feb. 28, Auditorium 3, 11:30 - 13:00  
**Diagnostic Procedures  
and Imaging in Uveitis**  
Carl Herbst, Bahram Bodaghi

## SPECTRALIS®

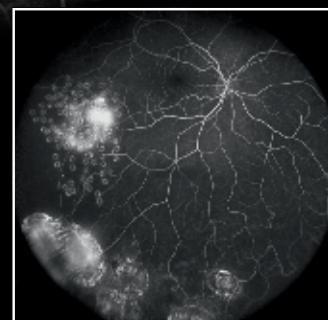

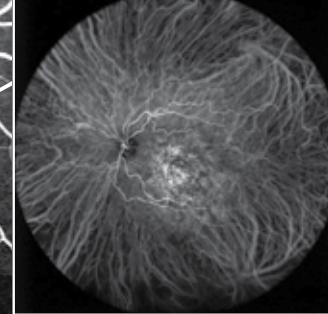

### Non-Contact Ultra-Widefield Angiography

The **Ultra-Widefield Angiography Module** captures images contact-free. The result is distortion-free, high contrast FA and ICGA images that are evenly illuminated out into the far periphery. All with the simple exchange of a lens.

All HRA2 and SPECTRALIS angiography models can be upgraded with the new Non-Contact Ultra-Widefield Angiography Module – a cost-effective alternative to separate widefield imaging devices.

Unlock the full potential of your HRA2 or SPECTRALIS angiography solution - See the whole Picture.
